TOTAL SYSTEM CONTROL

**Complete system control** that is easy to use and energy efficient. 7 Day programming ensures custom **comfort every day** of the week.

**Our comprehensive** Thermostat range includes the perfect Thermostat for every application. All our models operate via a floor sensor for accurate control and temperature regulation. As our Thermostats do not rely solely on air temperature, they can be located up to 50 metres away from the room they control.

### Features at a glance (5259)

- TOUCH SCREEN
- WHITE BACKLIT DISPLAY
- 7 DAY, 6 EVENT PROGRAMMING
- CAN CONTROL UP TO 16A
- HOLIDAY FUNCTION
- COMFORT AND SET BACK TEMPERATURE SETTINGS

# Comfort System 4

Completely Wireless system control, no need to run cables!

**The CS4 Central Controller - OCS4**

Communicates wirelessly with other units in the system and has an open field range of 100 metres, adequate for most houses. The range can be extended by activating a repeater function in the thermostats.

The easy to read, backlit display and logical menus make the unit extremely easy to use and the built in 16A thermostat ensures economical running costs.

**CS4 Panel Heater Controller - OSA4**

This unit makes it easy to control most heater types, no matter whether they are to be given a night temperature setback signal or to enable frost protection. The CS4 Panel heater Controller features both these functions and all you need is to select the one required. Easy installation beside heating panel.

**The CS4 Thermostat - OSD4**

These Thermostats offer four different control possibilities: floor temperature, room temperature, room temperature with floor temperature limitation and regulator mode. The thermostat feature a built in 2-pole interuptor, 16 A relay and a large easy to read display with backlight.

**Also available in silver, please contact our sales department for more details on 08700 41 21 41.**
