

# thermostats

TOTAL SYSTEM CONTROL

**Complete system control** that is easy to use and energy efficient. 7 Day programming ensures **custom comfort** every day of the week.

### New Improved Range

We have fine tuned our Thermostat range to simplify the selection process and we still have a solution to fit your requirement. All our models operate via a floor sensor for accurate control and temperature regulation. As our Thermostats do not rely solely on air temperature, they can be located up to 50 metres away from the room they control.

#### The 5259 Touchscreen Thermostat

- TOUCH SCREEN
- LED BACKLIT DISPLAY
- 7 DAY, 6 EVENT PROGRAM CAN CONTROL UP TO 16A

**Loadings**

All of our Thermostats are rated at 16A, however, you must Check with an electrician to determine the size of the fuse required for your heating circuit. Below is a guide to the maximum area of UFH that our 16A Thermostats can control safely.

**16A (3600W) is equivalent to;**

- 18m<sup>2</sup> - 200W Heating systems
- 24m<sup>2</sup> - 150W Heating systems
- 36m<sup>2</sup> - 100W Heating systems

**Thermostats & Electrical Accessories**
